

Symantec™ Mail Security for SMTP

Email security software with integrated, best-of-breed antispam, antivirus, and content filtering technologies stops spam, viruses, and other email-borne threats at the SMTP gateway

Typical scenario for small to medium sized organizations

High performance scenario for large enterprises

Overview

Symantec Mail Security for SMTP features best-of-breed antispam, antivirus, and content filtering protection for the SMTP gateway. The solution is Symantec Premium AntiSpam™, powered by award-winning Symantec Brightmail AntiSpam™ technology, which can detect spam with a greater than 97% effectiveness rate¹ and can prevent false positives with a 99.9999% accuracy rate². Real-time scanning using industry-leading Symantec AntiVirus™ technologies helps ensure protection from email-borne viruses delivered via spam and from known or emerging threats. Organizations

1. InfoWorld September 2004

2. Yankee Group Report 2004

benefit from expanded content filtering and compliance capabilities and increased protection against Day Zero viruses, spyware, and adware. Graphical message tracking enables administrators to easily track the status of any email message processed by the system. Convenient deployment with embedded MTA provides seamless integration into existing messaging environments.

Key benefits

- NEW! Day Zero virus prevention automatically quarantines suspicious messages to reduce vulnerability to early-stage attacks
- NEW! Spyware/Adware dispositions minimize infections due to malicious code
- NEW! Improved content filtering and compliance tools such as dictionary scanning inside attachments and true file typing help organizations meet corporate and regulatory compliance requirements
- NEW! Graphical message tracking lets administrators check the status of any email message processed by the system
- NEW! Comprehensive reporting helps administrators gain visibility with more than 50 on-demand and scheduled reports
- Email firewall technologies reduce directory harvest and other email-borne threats against the email structure

Data Sheet: Virus Protection, Antispam, and Content Filtering Symantec™ Mail Security for SMTP

- Next-generation policies combine multiple actions per recipient and dynamic group population with LDAP
- Spam protection features Symantec Premium AntiSpam³, powered by Brightmail AntiSpam technology, which can stop more than 97% of spam⁴ while producing less than one false positive for every million emails analyzed⁵
- Automatic spam and virus rules updates are delivered every 5–10 minutes, providing the most effective, real-time protection from new spamming techniques and traffic patterns
- Powered by Symantec AntiVirus engine—winner of 17 consecutive Virus Bulletin 100% Awards—to minimize network disruptions caused from virus outbreaks
- Delivered in a flexible software deployment option
- Backed by Symantec Security Response, the world's leading antivirus and Internet security research and support organization
